(54) **METHOD OF PREPARING PREPARATION FOR TREATMENT OF PATIENT WITH MALIGNANT NEOPLASM**

(57) **Abstract:**

FIELD: medicine, oncology, phytotherapy.  
SUBSTANCE: method involves selective removal of cicutoxin from water-hemlock tincture. Tincture is prepared by infusion of 10 g of dried or 5 g of crude water-hemlock roots or rhizomes with 100 g of 70% ethyl alcohol for 10 days. After

filtration activated carbon is added to tincture at ratio 1 part of activated carbon per 10 parts of tincture followed by shaking every 2 h for 2 days. Then the end product is filtered off through paper filter. Invention provides the possibility of oral use of tincture. EFFECT: improved method of preparing. 2 cl, 4 ex
